

Notice Watermain Work

2022 SE Area Street
Improvements - Phase 3

WATERMAIN WORK TO OCCUR IN YOUR AREA

You are receiving this notification because watermain work is to occur in your area. Your residence will be affected. The following streets will have watermain replacement: Birchknoll Drive and Portland Avenue (from County Road F to Martin Way)

WATER ACCESS

For the duration of the watermain work, temporary water access will be set up for all impacted residents. By setting up a temporary system, the contractor can replace components of the permanent underground system without disrupting service to your home.

The contractor will begin the set up of the temporary water access for Birchknoll Drive and Portland Avenue starting July 13 and through the week of July 18. **In order to set up the temporary water, the contractor will need access to an outside water spigot. The contractor will then need to complete the set up and check it is operating correctly from inside the home.** The contractor and the inspector will work with each resident to allow the contractor to complete the temporary water access set up.

These temporary water services will be visible blue pipe installed at each home. This above ground system is a live pressurized water system, please avoid hitting this pipe with your lawn mower. If you notice a leak in the blue pipe, please call the construction inspector at (651) 440-1119.
